SUPERARCHI

SUPER ARCHITECTURE / SINCE 2015

Space. Structure.
One project.

Architecture and engineering, from the brief to construction details. With fire safety integrated within the same team.

SUPERARCHI brings together architecture, engineering and fire safety. Full projects or focused commissions, shaped around each client’s brief.

Architecture and engineering

From the brief and concept to building-permit documentation, technical design and construction details across architecture, structure and building services.

Fire safety

Fire safety scenarios, documentation for ISU approvals and authorisations, and fire protection system design, integrated into the project.

Site experience, in every design detail.
Full projects or focused commissions.

SUPERARCHI

Technical expertise

Technical expertise in fire safety, structural resistance and stability, alongside physical security risk analysis.

Surveys and measurements

Building surveys, our own measurements and analysis of existing conditions as the starting point for the design brief and technical solution.

Team

Răzvan Ianași — director
Arh. Ovidiu George Nicolaie — architect

Certifications and authorisations

ISO 9001 · ISO 14001 · ISO 45001. Certification reference: ESQ07202312.
